Extra Info

Inge's mic goes directly into a vocal effects processor, Voicelive 2. This device has two symmetric XLR outs: One for the dry vocals, one for the effects. The output level can be switched between line or mic level.

If possible, we want to use a 50/50 mix of both signals. If there are problems with feedback, the volume of the effects channel can be reduced.

We do soundcheck in the usual order. With one exception: We start with the Voicelive, then do Inge's guitar. (So she can do dress&makeup during the other instruments soundcheck)

Monitor Groups

Group	Soundmix
Group 1	Group 1 Joost 100%, Inge Voicelive(dry) 70%, Keys, bass, synthbass, backings, guitar Inge
Group 2	Group 2 Inge Voicelive(dry) 100%, Inge Voicelive (effects) 100%, Joost 70%, Keys, bass, synthbass,backings, guitar Inge
